

## Visit to fire station

**Date: 25-4-14**

Real life experiences leave memorable effect on child's little minds. To make their learning experiences more realistic, a visit to fire station was organized. It was to make children aware about the use of fire brigade and how fire man helps people. Children were taken to the fire station. There, the fire man had shown them the objects like helmet and gumboots which saves them from fire while saving other people.

Children were also told that when they hear the sound of fire brigade, they should give the way so that it can reach the people in need, as fast as it can.
