

Visit to a Nursery

Student members of the Eco Club embody the philosophy of *Practical Learning*. Visit to the nearby Nursery, where plants are propagated and grown to usable size, made the learning more easy, effective and lasting. Various kinds of plants, flowers and seeds were at display for the visitors and students as well. Process of photosynthesis and germination of seeds were explained with real examples by the teacher & gardener accompanied. The fresh, cool and fragrant air could be easily felt & distinguished which made children realize the need of keeping our earth green.
