

'THE SMART FIREFIGHTING' WORKSHOP

Conducted by Mr. Meena

School fire safety is important for the simple reason that a large number of children are gathered at one place and a single fire can affect all of them. ... A fire in such places can go out of control and thus, fire safety in schools has become an extremely important issue. Keeping this in mind JMIS organized - '**The Smart Firefighting**' Workshop on May 23, 2019, by Mr Meena (Station Officer) for teachers providing a forum to help, identify and understand the needs for implementation of smart firefighting.

Fire Safety workshop was designed to create a safety mind-set amongst the participants and emphasized on simple yet effective fire safety practices. Through the workshop teachers learned about the mechanism of fire formation, fire prevention practices, dealing with different classes of fire and using portable fire extinguishers to fight fires. Fire safety workshop also touched upon all the important aspect of people's behavior during a fire emergency and the role of an individual during such situations.

Live demonstration were given where teachers also tried their hands-on-experiences on the different firefighting elements at school.
