

A Visit to the Mother Dairy – Experiential Learning

We at JMIS believe in all-round awareness and development of our students and strive to make them conscious of the world around. In order to familiarize the kids with the different dairy products and make them understand the usefulness of domestic animals our Pallav children were taken to Mother dairy at Dwarka on 13-08-18. The aim of the visit was to provide practical exposure to the students where they could experience the operations of the milk industry. Children learnt about different dairy products and how we get milk from milk booth. Knowledge and fun were the ingredients of the day!
